Dear Parents

We have been advised by two of our families that their children have been diagnosed with having Mumps over the weekend. The children involved are both members of our Reception classes.

We have not so far received medical confirmation of this diagnosis from their GP's or Public Health England but we wanted to keep you informed of this development.

If you are concerned about your child then please contact your GP or call NHS 111 or visit the NHS Choices website for more information.

Signs/Symptoms:

Swollen glands (either side of the face and just below the ears) which can cause pain tenderness and difficulty with swallowing.

More general symptoms may develop a few days before the glands swell. These may include:

- headache
- joint pain
- mild abdominal pain
- dry mouth
- loss of appetite
- high temperature
- feeling sick
- feeling tired

Empowering skilful, independent learners for the future
