

## Nursery

### PSED

We will be learning about rules, routines and behaviour. We will use appropriate language whilst playing and working co-operatively through sharing and turn taking. We will get to talk about our favourite things. We will get to talk about our family and people who are special to us. We will learn how to use the indoor and outdoor environment safely. In Nursery we will also take responsibility by being the helper of the day, line leader, and helping with milk and snack.

### Literacy

We will begin to learn to recognise our names - by finding them and putting them on the board in the morning. We will also start to recognise other children's names along with labels for the resources in our classroom.

Writing will be important in the Nursery and we will be reminded to have a go at 'writing' our names on our work, painting our stories and giving our words to our teachers to write.

In Nursery we will also get to listen to, and join in with lots of stories at the end of the day. Every Friday we get the chance to share our favourite stories with our friends and our parents and carers.

### Physical

In the Nursery we love to 'wiggle' and we will begin to listen to and follow instructions, from our teachers. In the Hall we'll have a go at climbing, balancing, creeping and crawling. Outdoors we'll have opportunities to practise balancing, climbing, playing ring games and riding a range of vehicles. We will also start to develop our fine motor skills by threading, colouring, cutting and starting to write.

### CL

Speaking and listening are very important skills and we will be practising ours in different ways. Sometimes we will work in large groups and listen to stories, sing songs, share our special things and times from home. At other times we will work in smaller groups chatting about ourselves, what we like for breakfast, the things we like to do, who lives at our house and news about the weekend.

### Maths

**Number focus:** We will begin to learn to recognise numbers to 10 and beyond. We will also practise counting the children at school and have opportunities to have a go at writing numbers, naming numbers, matching, sorting and counting things.

**Shape, Space and Measure focus:** We will work with shapes in different ways by making pictures, building with blocks, Duplo, matching shapes to outlines and noticing things that are the same shape by sorting, etc.

## "All About Me" (Entry Assessments)

Autumn 1 2016

### UW

Our world is a fascinating place and we love to explore both indoors and outdoors. We will have turns to take the registers to the office and this will help us feel at home and very confident. Outdoors we will explore the playground, the garden, the woods and Forest School. We will start to learn the names of the birds and animals we see and begin to notice the sounds we hear. We will talk about the changing leaves and why they fall.

### EAD

As we are just beginning in nursery we will have many new skills to learn including water colour painting, collage and junk modelling. We will also have fun dressing up and role playing and of course playing in the Home Corner. We will be singing and learning lots of new songs and Nursery Rhymes. We will also get to play with musical instruments and learn what they are called. We will also have certain songs to help us with the routine of the day such as tidy up time.
